Results-driven Developer with 3yrs of industrial experience, with expertise in Python, Django, and automation, skilled in database design, machine learning, and data visualization. Strong leadership, communication, and documentation skills with a collaborative approach to problem-solving. Adept at optimizing workflows and delivering high-performance solutions

PROFESSIONAL EXPERIENCE

Telloway

Jan 2023 – Present

Developer

- **Database CMS Integration:** Developed custom SQL integration between database systems and CMS, enabling automated content synchronization and reducing manual data entry
- **Database Architecture:** Designed efficient database relationships in Django for a blogging platform, optimizing SQL queries to fetch complex content relationships and improve site performance
- **Django Blog:** Led a cross-functional team to develop a high-performance blogging platform using Django, helped in increasing user engagement
- **Sentiment Analyzer:** Engineered a sentiment analysis system using NLP techniques to process and analyze social media data, providing actionable insights that optimized content strategies and enhanced brand engagement
- **Front-End Development:** Designed and implemented responsive web interfaces utilizing HTML, CSS, JavaScript & Bootstrap to enhance user experience
- **Scripting:** Developed robust Python scripts to automate workflows, significantly reducing deployment and delivery times
- **Data Analysis & Optimization:** Conducted comprehensive data analysis leveraging Python libraries and MS Excel to identify and resolve query bottlenecks in content retrieval, improving user engagement metrics across the platform
- **Data Visualization:** Developed interactive Power BI dashboards to visualize KPIs, enabling editorial and marketing teams to track audience engagement, content consumption, and identify trends for strategic decision-making

Cognizant

Oct 2021 – Jan 2023

Programmer Analyst/ RPA Developer

- **RPA Development:** Designed and implemented automation solutions using Blue Prism and UiPath to streamline claims processing for clients in the insurance domain
- **Fraud Insurance Claim Detector:** Engineered an ensemble machine learning fraud detection system for insurance claims, empowering stakeholders with data-driven insights that enhanced decision quality and operational efficiency
- **Bot Creation:** Developed end-to-end bots for automating tasks such as report generation and other business-critical processes, ensuring efficiency and accuracy
- **Documentation:** Prepared detailed daily reports on automated processes, ensuring seamless and uninterrupted workflows aligned with business requirements
- **Data Visualization:** Engineered specialized Microsoft Power BI dashboards and interfaces for the development team, providing critical real-time metrics and actionable insights that accelerated troubleshooting and optimized development workflows
- **RPA Lifecycle:** Extensive experience in managing and executing all stages of the RPA lifecycle
- **Agile Methodology:** Proficient in applying Agile best practices throughout development phases to enhance team collaboration and project efficiency
- **VBA Scripting:** Automated complex workflows using VBA scripting, ensuring error-free execution and optimized processes

- **Production Support:** Delivered hands-on production support during User Acceptance Testing (UAT), ensuring smooth deployment and operation of automation projects
- **Knowledge Transfer & Collaboration:** Facilitated seamless workflows through effective collaboration with cross-functional teams and structured knowledge transfer sessions

PROJECTS

Census 2011 Data Analysis of Indian States

2023

Python, Pandas, Matplotlib, Seaborn, Geopandas

- **Description:** Analyzed Census 2011 data and GDP (2018-19) data using Python libraries to create comprehensive visualizations representing demographic and economic trends across Indian states
- **Project Link:** [GitHub Repository](#)

Django Powered Blogging Website

2024

Django, HTML, CSS, JavaScript, Bootstrap

- **Description:** Developed a full-stack web application using Django framework with responsive design principles implemented using Bootstrap and custom CSS
- **Live Demo:** [Live Website](#)

EDUCATION

Lovely Professional University

Aug 2017 – Jun 2021

B.Tech in Computer Science and Engineering

CGPA: 7.1

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, HTML, CSS, JavaScript, Bootstrap

Tools & Technologies: RPA (Blue Prism, UiPath), SQL, Power BI, VBA

Areas of Expertise: Data Analysis, Machine Learning, Deep Learning, Web Development, Process Automation

CERTIFICATIONS

SQL Intermediate Certification ([View Certificate](#))

SQL Basic Certification ([View Certificate](#))

Google Maps Web Platform Badge ([View Certificate](#))

UI Path Certification ([View Certificate](#))

Generative AI Certification ([View Certificate](#))
